Concepts into a Strong Product

In a rapidly changing world, product requirements and customer needs are constantly shifting, which increases the demands on each and every one of us. This includes the demands placed on companies and brands.

Instead of reacting quickly, we need to be proactive. Instead of being generalists, we must aim for being specialists. Instead of guessing, we must be envisioning.

This is where our team of Formulation and development experts comes in to supportOU. Because even if beauty lies in the eye of the beholder, its origin always lies in the inspiration.

“ It’s not about ideas. We make ideas happen”

Concept

We have the capability of adding a **Differentiated Concept** to an Existing Range or working on entirely **New Idea**. Thanks to more than 14 years of Experience in Dermatology, we possess a high level of **Comprehensive Know-how and Systematic** Product Development System. **Tradition and Innovation** are second Nature at Lyra

Formula Development

Our **Dedicated team of Formulation Chemists** works on the concept to turn into an **Aesthetic, Effective and Stable** formulation. The FR & D team also conducts **Stability & Safety assessments** during the formulation development process.

Packing Section

A strong product needs to have an **Outer Appearance** that can live upto its **Quality**. We have a dedicated packing and design department supported by a **Separate Packaging QC team**. We have **Multiple Packaging Options** ranging from Round tubes, Oval Tubes, Airless Tubes to Glass/ Plastic Bottles, Jars and Airless containers.

Manufacturing

Our **Wide and Sophisticated Equipment** range helps us to manufacture a wide array of products ranging from simple solutions to **Very Complex Emulsion Systems** including **Micro and Nano Emulsions**. We have manufactured vessels from 300 Kg to 2000 Kg which gives us the **Flexibility** of manufacturing variable batch sizes.

Technical Support

High-Perormance Cosmeceutical Products need to be supported with Scientific Documentation. Our technical team assists in creating an **Effective Communication Brief** which forms the basis of a **Strong Brand**. We also provide assistance in **Safety/ Efficacy Substantiation** from renowned laboratories across the country and abroad.
